GDPR PRIVACY POLICY

Society for Translational Oncology

Society for Translational Oncology ("STO") prioritizes privacy and data security.

Accessing and using STO's website (the "Website") and associated mobile applications, domains, portals, and services (collectively with the Website, the "Services") does not require your submission of personal data, including without limitation personally identifiable information. However, utilization of the Services may require the processing of personal data. If the processing of personal data is necessary and there is no statutory basis for such processing, such as a contractual obligation to the data subject, STO generally seeks to obtain consent from the data subject.

The processing of personal data, such as names, addresses, email addresses, or telephone numbers, will be undertaken in a manner that is consistent with the requirements of the General Data Protection Regulation ("GDPR"). The purpose of this Policy is to provide users and potential users of the Services with information about the nature, scope, and purpose of the personal data STO may collect, use, and process, and to advise data subjects of their privacy rights under the GDPR.

STO has implemented technical and organizational measures concerning the protection of personal data as part of the Services. Internet-based data transmissions may have security gaps, however, which means that absolute privacy protection cannot be guaranteed by STO.

Definitions

This Policy refers to terms that are defined in the GDPR.

Name and Address of the Controller

For purposes of the GDPR, other data protection laws applicable in Member states of the European Union, and other provisions related to data protection, the "Controller" is:

Society for Translational Oncology
PO Box 12412
Durham NC 27709 USA
Phone: +1 919-433-0489
Email: admin@STO-Online.org
Website: https://STO-Online.org/

Name and Address of the Data Protection Officer

For purposes of the GDPR, other data protection laws applicable in Member states of the European Union, and other provisions related to data protection, the "Data Protection Officer" of the Controller is:

Director General
Society for Translational Oncology
PO Box 12412
Durham NC 27709 USA
Phone: +1 919-433-0489
Email: admin@STO-Online.org

Any data subject may, at any time, contact the Data Protection Officer directly with any questions and suggestions concerning data protection under this Policy.

Cookies

STO's internet pages utilize cookies. Cookies are text files that are stored in a computer system via an internet browser.

Many internet sites and servers use cookies. Many cookies contain a so-called cookie ID. A cookie ID is a unique identifier of the cookie. It consists of a character string through which internet pages and servers can be assigned to the specific internet browser where the cookie is stored. This allows visited internet sites and servers to differentiate the individual browser of the subject from other internet browsers that contain cookies. A specific internet browser can be recognized and identified using the unique cookie ID.

Through the use of cookies, STO is able to provide the users of its Services with a user-friendly experience that would not be possible without the cookie setting.

By means of a cookie, the information and offers provided through the Services can be optimized with the user in mind. Cookies allow STO to recognize the users of the Services in order to make it easier for users to utilize the Services. The use of cookies means that users do not have to enter access data (login credentials) each time the Services are accessed because this function is taken over by the Website, and the cookies are thus stored on the user's computer system. In other words, it is not necessary to log in again every time a new page is requested (*i.e.*, with each click). Another example is the virtual shopping cart associated with an online shop, which remembers the items that a customer has placed in the cart via a cookie.

While the functionality of the Services affords you the option to "opt in" to the use of cookies, in addition, the data subject may, at any time after opting in, prevent the setting of cookies through the Services by means of a corresponding setting of the internet browser used and may, as a result, deny the future setting of cookies. Furthermore, already set cookies may be deleted at any time via an internet browser or other software programs. This is possible in all popular internet browsers. If the data subject deactivates the cookie setting in the internet browser, not all functions of the Services may be usable.

Collection of General Data and Information

The Services collect a series of general data and information when a data subject or automated system calls up the Website. This general data and information are stored in the server log files. Data collected may include: (1) the browser types and versions used, (2) the operating system used by the accessing system, (3) the website from which an accessing system reaches the Services (so-called referrers), (4) sub-websites, (5) the date and time (so-called timestamp) of access to the internet site, (6) an internet protocol address (IP address), (7) the internet service provider (the "ISP") of the accessing system, and (8) any other similar data and information that may be used in the event of attacks on STO's information technology systems.

When using the general data and information, STO does not draw any conclusions about the data subject. Rather, this information is needed to: (1) deliver the content of the Services correctly, (2) optimize the content of the Services as well as its advertisement, (3) ensure the long-term viability of STO's information technology systems and website technology, and (4) provide law enforcement authorities with the information necessary for criminal prosecution in case of a cyber-attack. Therefore, STO analyzes anonymously collected data and information statistically, with the aim of increasing the data protection and data security of STO's enterprise, and to ensure an optimal level of protection for the personal data STO processes. The anonymous data of the server log files are stored separately from all personal data provided by a data subject.

Registration on the Website

The data subject has the opportunity to register on the Website of the Controller with the submission of personal data. The personal data entered by the data subject is collected and stored exclusively for internal use by the Controller and the data subject's own purposes. The Controller may request the data subject's permission to transfer the data subject's personal data to one or more processors that also use personal data for an internal purpose attributable to the Controller.

By registering on the Website of the Controller, the IP address (assigned by the ISP and used by the data subject), date, and time of the registration are stored. The storage of this data takes place against the background that this is the only way to prevent the misuse of the Services, and, if necessary, to make it possible to investigate committed offenses. Insofar as the storage of this data is necessary to secure the Services, the data is not passed on to third parties unless there is a statutory obligation to do so or if the transfer serves the aim of criminal prosecution.

The registration of the data subject and the voluntary submission of personal data are intended to enable the Controller to offer the data subject contents or services that may only be offered to registered users due to the nature of the content. Registrants may change the personal data provided during the registration at any time, or have the data completely erased from the Controller's data stock.

The Controller shall provide information upon request to each data subject as to what personal data is stored about the data subject. In addition, the Controller shall correct or erase personal data at the request or indication of the data subject, unless there are statutory storage obligations or other legal requirements making it necessary for the Controller to refrain from the correction or erasure.

Contact Via the Website

The Services contain information that enables a quick electronic contact as well as direct communication with STO, which also includes a general email address. If a data subject contacts the Controller by email or via a contact form, the personal data transmitted by the data subject is automatically stored. Such personal data transmitted on a voluntary basis by a data subject to the Controller is stored for the purpose of processing or contacting the data subject.

Routine Erasure and Blocking of Personal Data

The Controller shall process and store the personal data of the data subject only for the period necessary to achieve the purpose of storage, or for as long as legally required, whichever is longer.

Rights of the Data Subject

(a) Right of Confirmation. Each data subject shall have the right to obtain from the Controller the confirmation as to whether or not personal data concerning such individual or entity (a "Person") is being processed. If a data subject wishes to

exercise this right of confirmation, such Person may, at any time, contact the Data Protection Officer or other designated employee of the Controller.

(b) Right of Access. Each data subject shall have the right to obtain from the Controller free information about such Person's personal data stored at any time, a copy of the information, and the following additional information:

i. the purposes of the processing;

ii. the categories of personal data concerned;

iii. the recipients or categories of recipients to whom the personal data has been or will be disclosed, in particular recipients in third countries or international organizations;

iv. where possible, the envisaged period for which the personal data will be stored or, if not possible, the criteria used to determine that period;

v. the existence of the right to request from the Controller rectification or erasure of personal data, or restriction of processing of personal data concerning the data subject, or to object to such processing;

vi. the existence of the right to lodge a complaint with a supervisory authority;

vii. where the personal data is not collected from the data subject, any available information as to its source; and

viii. the existence of automated decision-making, including without limitation profiling, referred to in Article 22(1) and (4) of the GDPR and, at least in those cases, meaningful information about the logic involved, as well as the significance and envisaged consequences of such processing for the data subject.

(c) Furthermore, the data subject shall have a right to obtain information as to whether personal data is transferred to a foreign country or an international organization. Where this is the case, the data subject shall have the right to be informed of the appropriate safeguards relating to the transfer.

If a data subject wishes to exercise this right of access, such Person may, at any time, contact the Data Protection Officer or other designated employee of the Controller.

(d) Right to Rectification. Each data subject shall have the right to obtain from the Controller, without undue delay, the rectification of inaccurate personal data concerning such Person. Taking into account the purposes of the processing, the data subject shall have the right to have incomplete personal data completed, including without limitation by means of providing a supplementary statement. If a data subject wishes to exercise this right to rectification, such Person may, at any time, contact the Data Protection Officer or other designated employee of the Controller.

(e) Right to Erasure (Right to be Forgotten). Each data subject shall have the right to obtain from the Controller the erasure of personal data concerning such Person, without undue delay, and the Controller shall have the obligation to erase personal data, without undue delay, where one of the following grounds applies, as long as the processing is not necessary:

i. The personal data is no longer necessary in relation to the purposes for which the data was collected or otherwise processed;

ii. The data subject withdraws consent to which the processing is based according to point (a) of Article 6(1) of the GDPR, or point (a) of Article 9(2) of the GDPR, and where there is no other legal ground for the processing;

iii. The data subject objects to the processing pursuant to Article 21(1) of the GDPR and there are no overriding legitimate grounds for the processing, or the data subject objects to the processing pursuant to Article 21(2) of the GDPR;

iv. The personal data has been unlawfully processed;

v. The personal data must be erased for compliance with a legal obligation in the European Union or a Member State law to which the Controller is subject; or

vi. The personal data has been collected in relation to the offer of information society services referred to in Article 8(1) of the GDPR.

If one of the aforementioned reasons applies, and a data subject wishes to request the erasure of personal data stored by STO, such Person may, at any time, contact the Data Protection Officer or other designated employee of the Controller.

Where the Controller has made personal data public and is obliged pursuant to Article 17(1) to erase the personal data, the Controller, taking account of available

technology and the cost of implementation, shall take reasonable steps, including without limitation technical measures, to inform other controllers processing the personal data that the data subject has requested erasure by such controllers of any links to, or copy or replication of, such personal data, as far as processing is not required. The Data Protection Officer or other designated employee will arrange the necessary measures in individual cases.

(f) Right of Restriction of Processing. Each data subject shall have the right to obtain from the Controller restriction of processing where one of the following applies:

i. The accuracy of the personal data is contested by the data subject for a period enabling the Controller to verify the accuracy of the personal data;

ii. The processing is unlawful and the data subject opposes the erasure of the personal data and requests instead the restriction of its use instead;

iii. The Controller no longer needs the personal data for the purposes of the processing, but such data is required by the data subject for the establishment, exercise, or defense of legal claims; or

iv. The data subject has objected to processing pursuant to Article 21(1) of the GDPR pending the verification whether the legitimate grounds of the Controller override those of the data subject.

If one of the aforementioned conditions is met, and a data subject wishes to request the restriction of the processing of personal data stored by STO, such Person may, at any time, contact the Data Protection Officer or other designated employee of the Controller.

(g) Right to Data Portability. Each data subject shall have the right to receive the personal data concerning such Person, which was provided to a Controller, in a structured, commonly used and machine-readable format. Such Person shall have the right to transmit such data to another controller without hindrance from the controller to which the personal data has been provided, as long as the processing is based on consent pursuant to point (a) of Article 6(1) of the GDPR, or point (a) of Article 9(2) of the GDPR, or on a contract pursuant to point (b) of Article 6(1) of the GDPR, and the processing is carried out by automated means, as long as the processing is not necessary for the performance of a task carried out in the public interest or in the exercise of official authority vested in the Controller.

Furthermore, in exercising a right to data portability pursuant to Article 20(1) of the GDPR, the data subject shall have the right to have personal data transmitted directly from one controller to another, where technically feasible and when doing so does not adversely affect the rights and freedoms of others.

In order to assert the right to data portability, the data subject may, at any time, contact the Data Protection Officer or other designated employee of the Controller.

(h) Right to Object. Each data subject shall have the right to object at any time, on grounds relating to such Person's particular situation, to the processing of personal data concerning such Person which is based on point (e) or (f) of Article 6(1) of the GDPR.

STO shall no longer process the personal data in the event of the objection, unless STO can demonstrate compelling legitimate grounds for the processing which override the interests, rights, and freedoms of the data subject, or for the establishment, exercise, or defense of legal claims.

If STO processes personal data for direct marketing purposes, the data subject shall have the right to object at any time to processing of personal data concerning such Person for such marketing. This applies to profiling to the extent that it is related to such direct marketing. If a data subject objects to STO to the processing for direct marketing purposes, STO will no longer process the personal data for these purposes.

In addition, a data subject has the right, on grounds relating to such Person's particular situation, to object to processing of personal data concerning such Person by STO for scientific or historical research purposes, or for statistical purposes pursuant to Article 89(1) of the GDPR, unless the processing is necessary for the performance of a task carried out for reasons of public interest.

In order to exercise the right to object, the data subject may directly contact the Data Protection Officer or other designated employee of the Controller.

(i) Automated Individual Decision-Making. STO does not presently utilize automated decision-making, including without limitation profiling, but may employ these technologies in the future. The following rights would apply in the event STO utilizes automated decision-making technologies:

Each data subject shall have the right not to be subject to a decision based solely on automated processing, including without limitation profiling, which produces legal effects concerning such Person, or similarly significantly affects such Person, as long as the decision (1) is not is necessary for entering into, or the performance of, a contract between the data subject and the Controller, or (2) is not authorized by Union or Member State law to which the Controller is subject and which also lays down suitable measures to safeguard the data subject's rights and freedoms and legitimate interests, or (3) is not based on the data subject's explicit consent.

If the decision (1) is necessary for entering into, or the performance of, a contract between the data subject and the Controller, or (2) it is based on the data subject's explicit consent, AlphaMed shall implement suitable measures to safeguard the data subject's rights and freedoms and legitimate interests, at least the right to obtain human intervention on the part of the Controller, to express such Person's point of view and contest the decision.

If a data subject wishes to exercise the rights concerning automated individual decision-making, such Person may, at any time, directly contact the Data Protection Officer or other designated employee of the Controller.

(j) Right to Withdraw Data Protection Consent. Each data subject shall have the right, at any time, to withdraw such Person's consent to the processing of the data subject's personal.

If the data subject wishes to exercise the right to withdraw consent, such Person may, at any time, directly contact the Data Protection Officer or other designated employee of the Controller.

Legal Basis for the Processing

Where applicable, consent serves as the legal basis for processing for one or more specific purposes as described in point (a) of Art. 6(1) of the GDPR. If the processing of personal data is necessary for the performance of a contract to which the data subject is party, as is the case, for example, when processing operations are necessary for the supply of goods or to provide any other service, the processing is based on point (b) of Ar. 6(1). The same applies to such processing necessary for carrying out pre-contractual measures, for example in the case of inquiries concerning STO's products or services. If STO is subject to a legal obligation by which processing of personal data is required, such as for the fulfillment of tax obligations, the processing is based on point (c) of Art. 6(1). In rare cases, the processing of personal data may be necessary to protect the vital interests of the data subject or another

natural Person under point (d) of Art. 6(1). There may also be a legal basis for processing operations, which are not covered by any of the abovementioned legal grounds, if processing is necessary for the purposes of the legitimate interests pursued by STO or a third party, except where such interests are overridden by the interests or fundamental rights and freedoms of the data subject which require protection of personal data pursuant to point (f) of Art. 6(1).

Period for Which the Personal Data will be Stored

The criteria used to determine the period of storage of personal data is the applicable statutory retention period. After expiration of that period, the corresponding data is routinely deleted, as long as it is no longer necessary for the fulfillment of the contract or the initiation of a contract.

Provision of Personal Data as Statutory or Contractual Requirement; Requirement Necessary to Enter into a Contract; Obligation of the Data Subject to Provide the Personal Data; Possible Consequences of Failure to Provide Such Data

The provision of personal data is partly required by law (*e.g.*, tax regulations) or can also result from contractual provisions (*e.g.*, information on the contractual partner). At times it may be necessary to conclude a contract that the data subject provides STO with the use of personal data, which must subsequently be processed by STO. The data subject is, for example, obliged to provide STO with personal data when STO signs a contract with such person. The non-provision of the personal data would have the consequence that the contract with the data subject could not be concluded. Before personal data is provided by the data subject, the data subject may contact the Data Protection Officer. The Data Protection Officer will clarify to the data subject whether the provision of the personal data is required by law or contract or is necessary for the conclusion of the contract, whether there is an obligation to provide the personal data, and the consequences of non-provision of the personal data.

Existence of Automated Decision-Making

As explained more fully above, STO does not presently use automatic decision-making, including without limitation profiling.

Policy Modifications

STO may update this Policy from time to time without notice. Changes will become immediately effective upon posting on the Website unless otherwise noted. Your use of the Services following any such updates indicates your consent to the practices described in the revised Policy.

Policy Version: March 24, 2025
