Policy on Assigning Credit

- 60 minutes of participation in an accredited continuing education activity equals one credit.

- CE credit will be assigned in increments of 0.25 per quarter hour of time spent in the activity.

- The amount of CE credits an activity is accredited for will match the time spent in the learning experience and may also include time spent evaluating the activity.

- For text-based activities, the amount of credit will be determined using the Mergener Formula.

- When the CE activity is accredited for the learner's profession, the learner will receive the CE certificate for their profession upon successful completion of the activity. If the activity is not accredited for their profession, the learner will receive a certificate of completion.

Physicians

- For any *AMA PRA Category 1 Credit*™ designated activity, in any venue, physicians should be instructed to claim only the credit commensurate with the extent of their participation in the activity.

- Only physicians may receive a CME certificate awarding *AMA PRA Category 1 Credit*™.
